TONGUES/PRONGS

In an effort to eliminate confusion on orders PMC has attempted to codify all tongues. PMC tongue styles will start with a group of letters, separated by a hyphen, and followed by three numbers (i.e. J-E162, FF-EE200). The letter or group of letters to the left of the hyphen will signify the type of wire or stock being formed and its dimensions. The letter or group of letters after the hyphen will represent the style or shape of the tongue. The remaining three numbers will represent the length of the tongue in inches (i.e. J-E162 = 1.620 or 1-5/8"). Note that all tongues are measured from the middle of the tail (A), which wraps around the bridge, to the tongue tip (B).

J-B162

- J = Stock .120 x .060 half round
B = Tongue Style/Shape
162 = 1.620 or 1-5/8"

J-E162

- J = Stock .120 x .060 half round
E = Tongue Style/Shape
162 = 1.620 or 1-5/8"

K-H212

- K = Stock 1/4" x .047 half oval
H = Tongue Style/Shape
212 = 2.12 or 2-1/8"
